

Toyota Verso

Providing an ultra-reliable, quiet and smooth ride compared to its rivals in the compact MPV sector, the Verso also offers a number of useful, technologically-advanced features such as Hill-Start Assist Control.

Such is the level of safety measures, the Toyota Verso was voted the safest MPV of 2010 by Euro NCAP. Incorporating seven airbags and a range of advanced braking systems (anti-lock braking, electronic brakeforce distribution, Brake Assist and Vehicle Stability Control +), the Verso is one of the safest vehicles on the road. The care taken with safety extends beyond the interior, with the Verso's innovative structure reducing impact injury to the maximum possible extent.

The Verso also offers a high degree of security. A new boot management system enables drivers to hide valuable items out of sight, and the vehicle's Smart Entry locking system makes it impossible for anyone to gain access to the vehicle without the Verso's electronic keyfob.

Discover more about the new Toyota Verso or to arrange an on or off site test drive by calling **John Brightmore or Nick Kennett in our Business Centre on 01274 730 730.**
